CHABLIS

LA VIGNE DE 1975

VINES

The plot planted in 1975 and almost 50 years old is located in the village of Préhy on the Kimmeridgian, the upper layer of the Jurassic composed of clay and limestone, with a south-eastern exposure.

Surface : 1,5 ha

Middle Age : 50 years old

Yield : 55hL/ha

We practice a reasoned approach to viticulture having obtained the HVE level 3 label, which translates into ploughing which activates the organic and microbial life of the soil, partial grassing on certain plots and the use of natural fertilizers and treatments against diseases.

VINIFICATION

After a long and delicate pressing, a cold settling of about twenty hours, the fermentation took place at around 16° to 18° Celsius using indigenous yeasts.

We carry out the malolactic fermentation on fine lees from November to mid-April then a light fining and filtration on earth in order to obtain a clear and stable wine before bottling by us at the estate.

The aging is done exclusively in stainless steel vats to preserve the freshness and fruitiness of the wine. These vats are thermoregulated which allows fermentations to be carried out at low temperatures in order to best develop the aromas of the wine.

TESTING

Our Chablis Cuvée 1975 is a unique selection, this year being the birth year of Céline, Frédéric and our beloved Chablis vines. This cuvée is very dear to our hearts and offers us aromas of beautiful complexity. A bright yellow color, a fine and very fruity nose reminiscent of white-fleshed fruits and citrus fruits. Round and mineral in the mouth, it offers us a beautiful length.

Should be served between 10 to 12° Celsius and has a cellaring potential of 5 to 10 years.
